Severe-Service Union-Bonnet Needle Valves

N Series and HN Series

- Working pressures up to 10 000 psig (689 bar)
- Temperatures from –65 to 450°F (–53 to 232°C) with PTFE packing; up to 1200°F (648°C) with Grafoil® packing
- 316 stainless steel; 316/316L dual certified stainless steel (SSD), alloys 400, 20, 600, and C-276; and titanium materials

Features

Stem Designs

- Ball tip (NB)—3N, 6N, 12N, and 6HN
- Regulating (NR)—all models
- PCTFE soft-seat regulating (NKR)—all models
- PTFE soft-seat regulating (NTR)—3N, 6N, 3HN, and 6HN

Orifice Sizes

- 0.156 in. (4.0 mm)—3N and 3HN
- 0.250 in. (6.4 mm)—6N and 6HN
- 0.437 in. (11.1 mm)—12N

Flow Coefficients (C_v)

From 0.35 to 2.4

Flow Patterns

- Straight—all models
- Angle-3N, 6N, and 12N

Pressure-Temperature Ratings

Ratings are based on manual valves with optional Grafoil® packing. Ratings are limited to:

- 200°F (93°C) max with PCTFE stem tip (NKR).
- 250°F (121°C) max with UHMWPE stem packing.
- 450°F (232°C) max with PTFE stem tip (NTR) or stem packing.
- 600°F (315°C) max with PEEK stem packing and 316 SS, 316/316L SSD, alloy 20, alloy 600, alloy C-276, or titanium; 500°F (260°C) max with PEEK stem packing and alloy 400 (alloy 400 available in N series only).
- 1000°F (537°C) max with 316/316L SSD body, bonnet and stem components.

See Stem Packing Materials, page 675, for more information about packing materials.

Packing bolt design permits packing adjustments in the open position

Rolled and plated 316 SS stem threads enhance cycle life

Union-bonnet construction prevents accidental valve disassembly

Safety back seating seals in fully open position

 Nonrotating ball stem tip (shown) provides repetitive, leak-tight shutoff; regulating stem tip available

For more information about pressure ratings of valves with tube fitting end connections, see Swagelok® *Tubing Data* (MS-01-107), page 224. Pressure ratings of valves with VCR® or VCO® fitting end connections are based on the ratings of the mating fitting; see the Swagelok *VCR Metal Gasket Face Seal Fittings* catalog (MS-01-24), page 135, and Swagelok *VCO O-Ring Face Seal Fittings* catalog (MS-01-28), page 155, (VCR and VCO fittings available in N series only).

Flow Data at 100°F (37°C)

Flow Coefficient at Turns Open

NR, NTR, and NKR Regulating Stems

NB Ball Stem Tip

The NB stem is designed to be used in a fully open or fully closed position. See **Dimensions** for flow coefficients.

Testing

Every N series and HN series needle valve is factory tested with nitrogen at 1000 psig (69 bar). Seats have a maximum allowable leak rate of 0.1 std cm³/min. Shell testing is performed to a requirement of no detectable leakage with a liquid leak detector.

Cleaning and Packaging

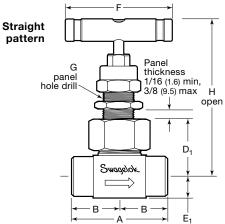

All N series and HN series needle valves are cleaned and packaged in accordance with Swagelok *Standard Cleaning and Packaging (SC-10)* (MS-06-62), page 1174. Cleaning and packaging in accordance with Swagelok *Special Cleaning and Packaging (SC-11)* (MS-06-63), page 1175, to ensure compliance with product cleanliness requirements stated in ASTM G93 Level C are available as an option.

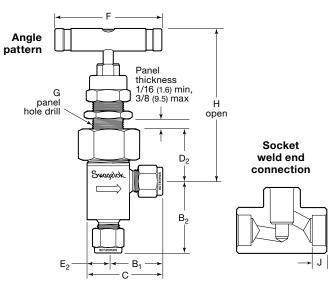

Ordering Information and Dimensions

Ordering Information and Dimensions

N Series

Select an ordering number.

To order other valve body materials, replace **SS** in the ordering number with a material designator.

Example: M-3NBF2

Material	Designator
Alloy 400	М
Alloy 20	C20
Alloy 600	INC
Alloy C-276	HC
Titanium	TI
316/316L	SSD

Ball Stem Tip Materials

Ordering numbers specify a cobaltbased alloy ball stem tip. N series valves of 316 SS are standard with this stem tip and require no designator.

To specify ball stem tip material for valves of other materials, add a designator to the ordering number.

Example: INC-6NBF4-HC

Angle-Pattern Valves

Ordering numbers that list *C* dimensions are available in angle patterns. To order, add **-A** to the ordering number. Example: SS-12NBF8**-A**

Ball Stem Tip Material/ ASTM Specification	Designator
Cobalt-based alloy	-STE
440C SS/A276	-440C
Alloy 400/B127 or B164	-M
Alloy 20/B463 or B473	-C20
Alloy C-276/B574 or B575	-HC
Titanium/B348 or B265	-TI

Options and Accessories

See page 675 for information about optional stem packings, stem designs, handles, and sour gas valves.

Ordering Information and Dimensions

HN Series (High Pressure)

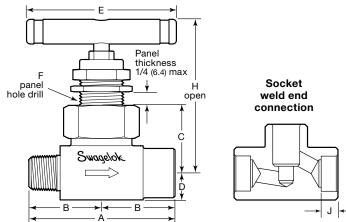

Select an ordering number.

Ordering numbers specify a regulating stem tip. Cobalt-based alloy ball stem tips are available for 6HN series valves. To order, replace **NR** in the ordering number with **NB**.

Example: 6HNBF4

Options and Accessories

See page 675 for information about optional stem designs, stem packings, and sour gas valves.

Dimensions shown with Swagelok tube fitting nuts finger-tight.

Dimensions, in inches (millimeters), are for reference only and are subject to change.

HN Series

Minimum actuator pressures and maximum system pressures

shown in the graphs below are based on factory adjustment of packing and stems lubricated with a silicone-based lubricant.

Packing nut adjustment may affect actuator performance. If

the load is too low, the packing may leak. If the load is too

high, the actuator may stall and the valve will not cycle.

Pneumatic Actuator Performance

Pneumatic Actuators

Swagelok 3N and 6N series valves can be equipped with pneumatic actuators in normally closed, normally open, and double-acting models.

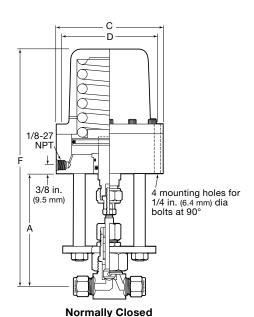

Actuator Technical Data

Pressure-Temperature Ratings

Normally closed: 150 psig at -20 to 300°F (10.3 bar at -28 to 148°C)

Normally open and double acting: 150 psig at -20 to 400°F (10.3 bar at -28 to 204°C)

Dimensions

Stem drive nut

Normally Closed

Adjustment of the actuator stem drive nut affects actuator spring force, which in turn affects:

- the maximum system pressure that can be shut off by the valve
- the minimum actuator pressure required to open the valve.

Figures 1 and 2 show the minimum actuator pressure required to open a normally closed actuator at system pressure.

Maximum system pressure for a 3N valve with normally closed actuator:

- NR, NTR, or NKR stem— 3000 psig (206 bar).
- NB stem—4400 psig (303 bar).

Maximum system pressure for a 6N valve with normally closed actuator:

- NR, NTR, or NKR stem— 3600 psig (248 bar).
- NB stem—4600 psig (316 bar).

n /hn Series Needle

Pneumatic Actuators

Ordering Information

To order a 3N or 6N series valve equipped with a pneumatic actuator, add a designator to the valve ordering number. Example: SS-3NBS4-95C

	Actuator Designator							
Valve Series	Normally Closed	Normally Open	Double Acting					
ЗN	-95C	-950	-95D					
6N	-96C	-960	-96D					

Normally Open Actuators

The amount the stem orifice opens beyond the cracked-open position depends on system pressure, flow characteristics, and valve packing nut adjustment.

Figures 3 and 4 show the minimum actuator pressure required to close a normally open actuator at system

pressure.

Normally Open

Swagelok

3N series with normally open actuator-1000 psig (69.0 bar).

opening the valve:

6N series with normally open actuator-500 psig (34.5 bar).

Minimum system pressure required to assist the spring in

Double-Acting Actuators

Figures 5 and 6 show the minimum actuator pressure required to open or close a 3N or 6N series valve with a double-acting actuator at system pressure.

Double Acting

Fig. 3–3N Series with Normally Open Actuator System Pressure, bar Minimum Actuator Pressure, psig 0 100 150 250 300 350 400 bar 10 Minimum Actuator Pressure, - 9 - 8 7 100 -6 - 5 - 4 50 -–з - 2 - 1 0 1 1 1.1 2000 1.1 1 | | | | 3000 11 5000 1.1 1000 4000 0 6000

Options and Accessories

N Series and HN Series

Stem Packing Materials

PTFE packing is standard. To order an optional stem packing material, add a stem packing material designator to the valve ordering number. See page 667 for pressuretemperature ratings of valves

Stem Packing Material	Designator
UHMWPE	-P
PEEK	-PK
Grafoil	-G

with optional stem packing materials.

UHMWPE (ultrahigh-molecular weight polyethylene) is intended for service where fluorocarbons are not acceptable. UHMWPE packing is lubricated with nickel antiseize with hydrocarbon carrier; it does not require packing supports.

PEEK (polyetheretherketone) packing material is a 2-piece chevron design including PEEK packing supports and molybdenum disulfide, fluorinated tungsten disulfide-based lubricant; stem packing replacement kits also contain nickel antiseize with hydrocarbon carrier. PEEK packing is not available in normally open or normally closed pneumatically actuated N series valves.

Grafoil is a high-temperature packing material that does not require packing supports. Factory assemblies contain fluorinated tungsten disulfide-based lubricant and nickel antiseize with hydrocarbon carrier; stem packing replacement kits contain only nickel antiseize with hydrocarbon carrier. Grafoil is not available in pneumatically actuated N series valves or 12N series valves with colored phenolic knobs.

Examples: SS-3HNRF4-P SS-6NBS8-PK SS-12NBF8-G

Stem Packing Kits

PTFE, UHMWPE, PEEK, and Grafoil stem packing kits are available. Kits contain stem packing(s), lubricant(s), and instructions.

Valve	Seal Material and Kit Ordering Number								
Series	PTFE	UHMWPE	Grafoil	PEEK					
3N, 3HN	T-9K-3N	PE-9K-3N	G-9K-3N	PK-9K-3N					
6N, 6HN	T-9K-6N	PE-9K-6N	G-9K-6N	PK-9K-6N					
12N	T-9K-12N	PE-9K-12N	G-9K-12N	PK-9K-12N					
Lubricant		ckel antiseize v drocarbon carr		Nickel antiseize with hydrocarbon carrier and fluorinated tungsten disulfide- based; molybdenum disulfide- based coating					

Stem Designs

N series valve ordering numbers specify NB ball stem tips. HN series valve ordering numbers specify NR regulating stem tips. To order valves with other stem designs, replace **NB** or **NR** in the ordering number with the desired stem design designator.

Stem Design	Designator
Regulating ^①	NR
PCTFE soft-seat regulating	NKR
PTFE soft-seat regulating [®]	NTR

 Not intended for repetitive shutoff in gas applications.
Not available in 12N series

Examples: SS-3**NR**F2 SS-3H**NKR**F2

Sour Gas Valves

Valves with female pipe ends are available for sour gas service. Materials are selected in accordance with NACE MR0175/ISO 15156. The body and bonnet are annealed 316 stainless steel; the stem is alloy 400. To order, add **-SG** to the valve ordering number.

Examples: SS-3NBF2-SG SS-3HNRF2-SG

Special Cleaning and Packaging (SC-11)

To order N series and HN series valves with optional cleaning and packaging to ensure compliance with product cleanliness requirements stated in ASTM G93 Level C, add **-SC11** to the valve ordering number.

Example: SS-3NBF2-SC11

n /hn Series Needle

Options and Accessories

N Series Handles

Anodized black aluminum bar handles are standard. Colored phenolic (with brass insert) and 316 stainless steel bar handles are available.

Exception: 12N series valves with Grafoil packing are not available with colored phenolic knobs.

To order, add a handle designator to the valve ordering number.

Examples: SS-3NBS4**-BKP** SS-12NBF8**-SH**

Handle	Designator
Black phenolic knob	-BKP
Blue phenolic knob	-BLP
Green phenolic knob	-GRP
Orange phenolic knob	-OGP
Red phenolic knob	-RDP
Yellow phenolic knob	-YWP
Stainless steel bar	-SH

Oxygen Service Hazards

For more information about hazards and risks of oxygenenriched systems, see the Swagelok *Oxygen System Safety* technical report (MS-06-13), page 1184.

HN Series Ball Stem Tip Materials

Cobalt-based alloy is standard. To specify other ball tip materials, add a ball stem tip material designator to the valve ordering number:

Example: SS-6HNBF4-M

Ball Tip Material/ ASTM Specification	Designator
440C SS/A276	-440C
Alloy 400/B127 or B164	-M
Alloy 20/B463 or B473	-C20
Alloy C-276/B574 or B575	-HC

Additional Valve Materials

Alloy 625, alloy 825, Alloy 2507 super duplex stainless steel, and 6-moly materials are available for N and HN series valves. See the Severe-Service Union-Bonnet Needle Valves—Special Alloy Materials catalog, MS-02-365.

- A packing adjustment may be required periodically to increase service life and to prevent leakage.
- ▲ Valves that have not been cycled for a period of time may have a higher initial actuation torque.
- ▲ To increase service life, ensure proper valve performance, and prevent leakage, apply only as much torque as is required to achieve positive shutoff.

N / HN SERIES JEEDLE

Caution: Do not mix or interchange parts with those of other manufacturers.

About this document

Thank you for downloading this electronic catalog, which is part of General Product catalog Swagelok published in print. This type of electronic catalog is updated as new information arises or revisions, which may be more current than the printed version.

Swagelok Company is a major developer and provider of fluid system solutions, including products, integration solutions and services for industry research, instrumentation, pharmaceutical, oil and gas, power, petrochemical, alternative fuels, and semiconductor. Our manufacturing facilities, research, service and distribution facilities support a global network of more than 200 authorized sales and service centers in 57 countries.

Visit www.swagelok.com to locate your Swagelok representative and obtain any information on features, technical information and product references, or to learn about the variety of services available only through authorized sales centers and service Swagelok.

Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Warranty Information

Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit your Swagelok Web site or contact your authorized Swagelok representative.
