# Special Alloy Ball Valves

## 60 Series

- 3/8 to 1 in. sizes
- Alloy 625, alloy 825, alloy 2507 super duplex stainless steel, and 6-moly materials
- On-off (2-way) valves
- Compensating seat design
- Live-loaded, two-piece stem packing

#### Important Information About Swagelok Process Ball Valves

- $\triangle$  Swagelok ball valves are designed to be operated in a fully open or fully closed position.
- A Packing adjustment may be required during the valve's service life.

#### **Features**

- Quarter-turn actuation
- Alloy 625, alloy 825, alloy 2507 super duplex stainless steel, and 6-moly
- Reinforced PTFE seat materials; other materials available
- Variety of end connections in 3/8 to 1 in. sizes
- Pneumatic and electric actuators
- Optional vent porting

#### **On-Off (2-Way) Valve**

## Unique coned-disc spring-loaded seat

- compensates for seat wear, pressure, and temperature changes
- reduces seat wear from pressure surgesseals regardless of
- flow direction

**Coned-disc spring** 

Flange seal provides leak-tight seal between flange and center body

Seat

contains the seat and protects against seat bulge, premature wear, and deformation

Ball

Swagelok

## **Features**

#### Flexing seat design ensures leak-tight seal in both low- and high-pressure systems

Under low pressure, seals are created by the coned-disc spring-loaded seats pushing against the ball. Pressure is not required to create a seal.

Under high pressure, the ball is forced downstream, flexing the downstream seat and creating a seal. The upstream seat also flexes with the ball movement and maintains a seal.

4 Special Alloy 60 Series Ball Valves

## **Pressure-Temperature Ratings**

Pressure-temperature ratings for special alloy 60 series valves are based on standard materials of construction as listed in the table to right and in the table notes below.

## **Reinforced PTFE Seats (60T)**

Material	Alloy 625, Alloy 825, Alloy 2507, 6-Moly
Temperature °F (°C)	Working Pressure
-20 (-28) to 100 (37)	2200 (151)
150 (65)	1850 (127)
200 (93)	1500 (103)
250 (121)	1150 (79.2)
300 (148)	800 (55.1)
350 (176)	560 (38.5)
400 (204)	330 (22.7)
450 (232)	100 (6.8)

Ratings based on reinforced PTFE seats and packings, alloy X-750 stem bearings, and fluorocarbon FKM O-rings.

## Virgin PTFE Seats (60V Series)

Material	Alloy 625, Alloy 825, Alloy 2507, 6-Moly
	Working Pressure
Temperature, °F (°C)	psig (bar)
-20 (-28) to 100 (37)	1500 (103)
150 (65)	1500 (103)
200 (93)	1500 (103)
250 (121)	1150 (79.2)
300 (148)	800 (55.1)
350 (176)	560 (38.5)
400 (204)	330 (22.7)
450 (232)	100 (6.8)

Ratings based on virgin PTFE seats and packings, alloy X-750 stem bearings, and fluorocarbon FKM O-rings.

## Carbon/Glass PTFE Seats (60C Series)

Material	Alloy 625, Alloy 825, Alloy 2507, 6-Moly
	Working Pressure
Temperature, °F (°C)	psig (bar)
-20 (-28) to 100 (37)	2500 (172)
150 (65)	2030 (139)
200 (93)	1560 (107)
250 (121)	1480 (101)
300 (148)	1240 (85.4)
350 (176)	860 (59.2)
400 (204)	480 (33.0)
450 (232)	100 (6.8)

Ratings based on carbon/glass PTFE seats, reinforced PTFE packings, alloy X-750 stem bearings, and fluorocarbon FKM O-rings.

## Polyethylene Seats (60E Series)

Material	Alloy 625, Alloy 825, Alloy 2507, 6-Moly
	Working Pressure
Temperature, °F (°C)	psig (bar)
-20 (-28) to 100 (37)	2500 (172)
150 (65)	2030 (139)
200 (93)	1160 (79.9)
250 (121)	250 (17.2)

Ratings based on UHMWPE seats and packings, PEEK stem bearings, and ethylene propylene O-rings.

## **Materials of Construction**

		Valve Body Materials			
		Alloy 625 Alloy 825 Alloy 2507 6-Moly			
	Component	Material Grade/ASTM Specification			
1	Stem nut		316	SS	
2	Stem spring	Stra	ain-hardene	d 316 SS/A2	240
3	Stop plate	204	SS/A040 a	× 216 66/40	40
4	Handle	304	- 33/A240 C	01 310 33/AZ	.40
5	Handle sleeve		Vii	nyl	
6	Grounding spring		302 SS	S/A313	
7	Stem nut		Alloy	/ 400	
8	Stem springs (2)	Stra	ain-hardene	d 316 SS/A2	240
9	Gland	P	FE-coated	316 SS/B78	3
10	Packing support		PE	EK	
11	Top packing		Reinford	od DTEE	
12	Bottom packing		Reinforced PTFE		
13	Body	Alloy 625/ B446	Alloy 825/ B425	Alloy 2507/ A479	6-moly/ A276
14	Stem bearing(s)		Alloy X-750	AMS 5542	
15	Stem				
16	Ball	Alloy 625/	Alloy 825/ B425	Alloy 2507/	6-moly/
17	Support rings (2)		D420	//4/0	71270
18	Seats (2)		Reinforc	ed PTFE	
19	Coned-disc springs (2)	Alloy X-750/AMS 5542			
20	Flange seals (2)	Fluorocarbon FKM			
21	Flanges (2)	Alloy 625/ Alloy 825/ Alloy 2507/ 6-moly/ B446 B425 A479 A276			
22	Body fasteners (4)	Alloy	K-500/FED	SPEC QQ-N	I-286
23	Body hex nuts (8)		Alloy 40	00/B164	
	Lubricants	Silicone-based and PTFE-based; other lubricants available			

Wetted components listed in italics.

#### **Additional Seat Materials**

Valves with Seats of	Also Contain	And These Lubricants
Carbon/glass PTFE	Same as valves v	vith PTFE seats
UHMWPE	UHMWPE packing, PEEK stem bearing, <sup>①</sup> ethylene propylene O-rings, and uncoated packing gland	Hydrocarbon-based and silicone-based
Virgin PTFE	Virgin PTFE packing	Silicone-based and PTFE-based

Molybdenum disulfide coated.

#### **Materials of Construction**

### Testing

Every special alloy 60 series ball valve is factory tested with nitrogen at 1000 psig (69 bar) or its maximum working pressure if less than 1000 psig (69 bar). Seats have a maximum allowable leak rate of 0.1 std cm<sup>3</sup>/min, lower than allowable in FCI 70-2 Specification Class VI.

Shell testing with nitrogen at 1000 psig (69 bar) or the maximum rated pressure if less than 1000 psig (69 bar) is performed to a requirement of no detectable leakage with a liquid leak detector.

Positive Material Identification (PMI) testing is performed on 100% of the products designated as "exotic" materials that are classified as pressure containing or wetted.

## **Cleaning and Packaging**

Every special alloy 60 series ball valve is cleaned in accordance with Swagelok *Standard Cleaning and Packaging (SC-10)*, MS-06-62.

#### **Dimensions**

Dimensions, in inches (millimeters), are for reference only and are subject to change.

#### Swagelok Tube Fitting End Connections

Dimensions shown with Swagelok nuts finger-tight. See **Ordering Information** below.

#### Female Pipe Thread End Connections

Female NPT pipe thread dimensions conform to ASME B1.20.1. See **Ordering Information** below.

	Ordering	Orifice				Dim	ensions, in.	(mm)		
Size	Number	in. (mm)	$C_v$	С	D	E	F	G	Н	J
				Swag	elok Tube F	itting				
1/2 in.	-63TS8	0.406 (10.3)	7.5	4.04 (103)	2.02 (51.3)	2.35 (59.7)	1.79 (45.5)	0.89 (22.6)	4.50 (114)	1.78 (45.2)
3/4 in.	-63TS121	0.516 (13.1)	13.6	4.04 (103)	2.02 (51.3)	2.35 (59.7)	1.79 (45.5)	0.89 (22.6)	4.50 (114)	1.78 (45.2)

1 in.	-65TF16	0.875 (22.2)	38	3.59 (91.2)	1.80 (45.7)	2.94 (74.7)	2.52 (64.0)	1.25 (31.8)	6.00 (152)	2.50 (63.5)

① Available in alloy 825 and alloy 2507 materials only.

② Available in alloy 825 materials only.

## **Ordering Information**

Select a basic ordering number from the **Dimensions** table. Add the valve body material designator from the table below to the basic ordering number.

Examples: 825-63TS8, 6MO-65TF16

Valve Body Material	Designator
625	625
825	825
Alloy 2507	2507
6-Moly	6MO

#### Additional Seat Materials

Standard valve ordering numbers specify reinforced PTFE seat material. For other seat materials, replace  $\mathbf{T}$  with the desired designator. Not all seat material and flange seal combinations are available. Contact your authorized Swagelok representative.

Examples: 2507-63CS8, 6MO-65EF12

Seat Material	Designator
Virgin PTFE	V
Carbon/glass PTFE	С
UHMWPE	E

#### Additional Flange Seal Materials

Fluorocarbon FKM is standard flange seal material. For other materials, add a flange seal material designator to the valve ordering number. Not all flange seal and seat material combinations are available. Contact your authorized Swagelok representative.

#### Examples: 625-63TS8-B, 6MO-63TF6-IN

Flange Seal Material	Designator	Temperature Range °F (°C)
Alloy X-750, PTFE coated	IN	-65 to 450 (-53 to 232)
Buna N	В	-20 to 250 (-28 to 121)
Buna C	BC	-65 to 250 (-53 to 121)
Ethylene propylene	E	-20 to 250 (-28 to 121)
Neoprene	N	-20 to 250 (-28 to 121)
PTFE	Т	50 to 150 (10 to 65)

## Swagelok

## **Options and Accessories**

#### Handles

Locking Lever Bracket Handle

**Oval Handle** 

A variety of handle options is available for use with 60 series ball valves. To order a locking lever bracket handle, add **-JL** to the ordering number. To order an oval handle, add **-JK** to the ordering number. For additional information and dimensions, see the Swagelok *Process Ball Valves Handle Options* catalog, MS-01-137.

### Low Dead Space Inserts

- Reduce fluid entrapment around the ball, stem, and seats while the valve is in the open or closed position.
- Made from carbon/glass reinforced PTFE.

To order, add **-LD** to the valve ordering number.

Examples: 625-63TS8-LD

#### Kits for Field Assembly

Select an ordering number.

Valve Series	Kit Ordering Numbers
63	TGC-91K-63-LD
65	TGC-91K-65-LD

#### **Vented Valves**

#### Internal Vent Option

On-off (2-way) ball valves are available with an internal vent. These vents are available for either upstream or downstream service. To order a valve with an internal vent, insert **NDV** for downstream vent or **NUV** for upstream vent into the valve ordering number.

Example: 625-63TNDVS8

#### Panel Mount Kits

#### **Ordering Information**

Select an ordering number.

Kits include self-cinching nut, cover plate, cap screws, panel mount brackets, and instructions.

Allow vertical or horizontal
mounting.

- Can be installed on panels up to 1/4 in. (6.4 mm) thick.
- Fit oval and lever handle.
- Provide template for drilling holes.

Valve Series	Kit Ordering Number
63	MS-PMK-S63
65	MS-PMK-S65

#### **Maintenance Kits**

Each kit contains seal, flange seal, lubricant, and fasteners. Contact your Swagelok representative for more information.

#### **Pneumatic Actuators**

Swagelok rack and pinion pneumatic actuators are available for the special alloy, 60 series ball valves. See the Swagelok *General Purpose and Special Application Ball Valves*—60 *Series* catalog, MS-01-146.

#### **Options for Pneumatic Actuators**

Swagelok can provide factory assemblies with pneumatic actuators, solenoid valves, limit switches, and position sensors, as well as kits for field assembly. For more information, see the *Swagelok Ball Valve Actuation Options* catalog, MS-02-343.

#### **Oxygen Service Hazards**

For more information about hazards and risks of oxygenenriched systems, see the Swagelok *Oxygen System Safety* technical report, MS-06-13.

#### Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Caution: Do not mix or interchange parts with those of other manufacturers.

#### Warranty Information

Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit swagelok.com or contact your authorized Swagelok representative.
